Week-by-Week Curriculum

Week 1 — Excel Fundamentals

2 Sessions

1

Getting Started with Excel

90 min

Excel interface & ribbon, workbooks vs worksheets, cells/rows/columns, basic navigation & shortcuts, saving files & file types.

2

Data Entry & Formatting

90 min

Entering & editing data, cell formatting (fonts, borders, colors, number formats), basic formulas (+, -, ×, ÷) and AutoSum.

Week 2 — Working with Data

2 Sessions

3

Essential Functions

90 min

Using SUM, AVERAGE, COUNT, MAX, MIN and a beginner-friendly introduction to the IF function for simple logic-based calculations.

4

Sorting, Filtering & Referencing

90 min

Sorting & filtering data, conditional formatting, and understanding relative vs. absolute cell referencing (\$A\$1).

Week 3 — Visualization & Practical Skills

2 Sessions

5

Charts, Graphs & Page Setup

90 min

Creating bar, line & pie charts, formatting visuals, and preparing sheets for printing & sharing.

6

Intro to Pivot Tables + Mini Project

90 min

Building your first Pivot Table to summarize data, followed by a hands-on mini project and open doubt-clearing session.

What You'll Be Able to Do

- Confidently navigate & use Excel for everyday tasks
- Write formulas and apply essential functions
- Organize, sort & filter data efficiently
- Build simple charts and your first Pivot Table
- Prepare clean reports for study, work or business

Who Should Join

- Absolute beginners — no prior Excel experience needed
- School/college students & fresh graduates
- Job-seekers wanting a practical, resume-ready skill
- Working professionals & small business owners
